

Target Area 4 Climate Mitigation and Adaptation

2022 OCP Targeted Update

With a focus on creating more sustainable, compact, and complete communities, we will apply a ‘climate lens’ to OCP policy development and updates. Guided by the [2050 Community Energy and Emissions Plan \(2022\)](#), this includes developing land use and policy scenarios to assess policy updates and their energy and emissions impacts. We will also explore the impacts of fill with respect to flood protection and farm land viability.
